Collaborative dance project **Camden Place** have teamed up with producer and DJ **Louise DaCosta** on a new remix of single **A Life In Photos**, due for release on **30th June 2021** via **DaCosta Records**.

DaCosta brings the sound of the summer as she combines progressive house with future house in order to create a sound that is undeniably vibrant throughout. Talking about the single, Camden Place producer **Rohan Healy** explains... "we wanted to create something that would make you move your body, but also move the heart, the Camden Place original carries a bittersweet message of lost love, and Louise DaCosta's remix just takes it all to a whole new level!". *A Life In Photos* originally featured Irish songwriter **Seán Silke**, independent production studio and label **Beardfire Music**, electronic producer **Magician's Assistant** and singer-songwriter **Grainne Hunt**.

DaCosta was raised in Derry, Northern Ireland and attended Queens University Belfast. Later taking up a DJ residency at Kellys/Lush of Portrush, Envy Derry - the only LGBTQ club in the north west, and other venues across Ireland; Louise began writing and releasing music with multiple labels and touring internationally. To date, DaCosta has scores three consecutive No. 1s on **Beatport** as well as dozens of Top 10s & Top 20 commercial chart successes. After working with numerous studios, Louise decided to take control of my own music, launching her own label in 2019 - DaCosta Records.

The Beardfire producers are **David Virgin**, Rohan Healy and **Al Quiff**, who have collectively worked with the likes of **Nick Cave**, **INXS**, **Leslie Dowdall (In Tua Nua)**, **Mary Black**, **The Cruel Sea**, **RUNAH**, **Patricia Lalor**, **Cat Power**, **Billy Bragg** and **Lloyd Cole** to name but a few. Between them, Camden Place have previously received praise from the likes of **Hot Press**, **Earmilk**, **The Thin Air** and **Atwood Magazine**.

A Life In Photos (Louise DaCosta remix) is due for release on **30th June 2021** via **DaCosta Records**.
